# IDENTIFY THE VULNERABLE AREAS FOR PRESSURE ULCERS

STOP THE PRESSURE
#EVERYMOVEMATTERS

## STOP THE PRESSURE!

## Know your PRESSURE POINTS

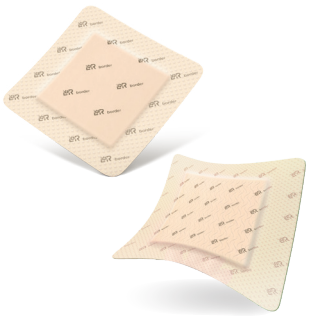

**Pressure ulcers** are areas of damage to your skin and the tissue underneath that are usually formed on bony parts of the body, such as heels, elbow, hips and tailbone.

**REMEMBER:** Change position every 2 hours

### Debrisoft® Duo and Debrisoft® Lolly®

Assess and prepare the Pressure Ulcer wound with debridement using Debrisoft® to reveal the extent of the wound.

### Suprasorb® P sensitive and Suprasorb® P SensiFlex

Dress the wound e.g. with Suprasorb® P sensitive silicone foam or Suprasorb® P SensiFlex dressing to protect and support wound healing.

## Ordering codes

### Suprasorb® P sensitive
border foam (with super-absorbent core)
