Achieving vascular outcomes by smart debridement

Kerry Hawkins, Vascular Nurse Specialist, Southport and Ormskirk NHS Trust

Fact:
Wound debridement must be undertaken quickly and efficiently in a way that is acceptable to the patient (Gray et al., 2011)

Fact:
Total cost of larval therapy product alone in the Trust year ending April 2012 was £18,024

Fact:
Money saved will be invested back into education and training

£6.19
3-10 minutes

£465
5-15 days (Average)

Fact:
5 active debridement* patients

Prospective evaluation

Patient friendly

Safe, rapid and effective

Minimal training required

Early use in the community will prevent unnecessary hospital admissions
