

Generating compression hosiery prescriptions during the coronavirus outbreak

We understand the critical need for self-care and ongoing hosiery supply to prevent deterioration of lower limb conditions. Continued prescribing of compression hosiery will ensure your patient's condition is managed and they remain healed post venous leg ulceration, preventing an even bigger long-term challenge.

L&R have developed this simple guide to support you with the continuation of lower limb care.

To access any of the resources in this guide please click on the interactive links in the document.

Support for phone or video consultations

If you are conducting consultations over the phone or video, the below tools can simplify your decision making and achieve the best outcome for your patient.

- **CHROSS Checker** - For ease of hosiery selection
- **L&R Hosiery Selector App** - Easy to follow App that assists with selecting the correct hosiery for the patient's condition and provides ordering codes, all in one place.

Download from www.lohmann-rauscher.co.uk/sizer, App Store or Google Play

- **Editable patient record forms** - for ease of ordering **Activa®** and **ActiLymph®** hosiery

Support for prescription generation

To ensure the prescription is processed efficiently please ensure the prescription contains the following:

- Brand/type of garment
- Class of hosiery
- Colour
- Style
- Quantity to be dispensed

Support for ease of dispensing

Daylong's home delivery service provides delivery of your patient's prescription products direct to their door, minimising human contact.

Our support page provides information on how to send prescriptions to **Daylong Direct** by either **Freepost** method or raising **electronic prescriptions**.

Support for the patient

By enabling patients to self-care, understand their condition, and supporting them to continue to receive prescriptions for their compression garments at this time is vital in maintaining leg health.

Direct your patient to our **new website** and resources that provide **motivation, knowledge, and guidance** on leg health.
