

ReadyWrap®

Measuring the upper limb.

How to measure the arm:

Measure the arm in a supported and relaxed position with the elbow slightly flexed.

The measurement points refer to the following anatomical landmarks:

Circumference points:

- cA** widest width of the Palm, just below the metacarpal phalangeal joints
- cC** narrowest point of the Wrist
- cE** around the Elbow joint and into the crease of the elbow
- cG** top of the Arm, just below the axillary crease

Lengths:

- IA-C** the length between point A (widest width of the palm, just below the metacarpal phalangeal joints) and point C (narrowest point of the wrist)
- IC-G** the length between point C (narrowest point of the wrist) and point G (top of the arm, just below the axillary crease)

NB c = circumference, l = length

All length measurements should follow body contour.

All measurements to be in centimetres.

Write your measurement results in the **box** adjacent to measuring point

Delivery: to orderer directly to patient

Name and address of recipient:
